

Suitability Is Indicated By The Following Categories:

A - SUITABLE for use at 100°C

B - SUITABLE for use at worldwide ambient temperatures

I - SUITABLE for INTERMITTENT use only at worldwide AMBIENT temperatures. Intermittent use is typical of ship to shore or road tanker transfer operations where the hose is not left full of product after use.

X - UNSUITABLE - Do not use

BLANK - no data present

Coupling Type

U - Couplings unsuitable or no data available

S - Couplings suitable for the operating conditions applicable to the hose

PRODUCT	Concentration (%)	Code						Coupling Type
